Alpha-1 Antitrypsin

Order Name: ALPH 1 ANT
Test Number: 5000150
Revision Date: 02/09/2021

| TEST NAME | | | METHODOLOGY | LOINC CODE |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|----------------------------------|-----------------------|
| Alpha-1 Antitryps | in | | Quantitative Immunoturbidimetric | 1825-9 |
| SPECIMEN REQU | JIREMENTS | | | |
| Specimen | Specimen Volume (min) | Specimen Type | Specimen Container | Transport Environment |
| Preferred | 1mL (0.2) | Serum | Clot Activator SST | Frozen |
| Instructions | Allow specimen to clot completely at room temperature. Separate serum or plasma from cells ASAP or within 2 hours of collection. Stability After separation from cells: Ambient N/A, Refrigerated 2 days, Frozen 3 months (avoid repeated freeze/thaw cycles) | | | |

| GENERAL INFORMATION | | |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Testing Schedule | Mon-Sat | |
| Expected TAT | 1-3 Days | |
| Clinical Use | Congenital deficiency of alpha-1-antitrypsin (AAT) is associated with development of emphysema at an unusually early age and an increased incidence of neonatal hepatitis with progression to cirrhosis. Diagnosis of AAT deficiency. | |
| CPT Code(s) | 82103 | |
| Lab Section | Immunology - Serology | |
