

Amoxicillin Level, LCMS

Order Name: **Amox Lvl**
Test Number: 6905623
Revision Date: 10/06/2017

TEST NAME	METHODOLOGY	LOINC CODE
Amoxicillin Level, LCMS	Liquid Chromatography/Tandem Mass Spectrometry	

SPECIMEN REQUIREMENTS

Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment
Preferred	1 mL (0.5 mL)	Serum	Clot Activator (Red Top, No-Gel)	Refrigerated
Instructions	<p>Specimen Type: Red-top tube Specimen Storage: FREEZE Specimen Collection: Serum should be separated from cells within two hours of venipuncture. Send serum in a plastic transport tube before freezing. Special Instructions: NOTE: Drug dose and frequency, including time of last dose should be indicated on request form. Testing referred to National Jewish Health NJHCO#PKAMX Was AMXLB Specimen Stability: Ambient: 24 hours, Refrigerated : Not Available, Frozen: Not Available</p>			

GENERAL INFORMATION

Expected TAT	14-18 days
Performing Labcorp Test Code	816458
Notes	Labcorp Test Code: 816458
CPT Code(s)	80299
