

NGS Solid Tumor Panel

Order Name: **NGS Solid Tumor Pnl**
 Test Number: 6980324
 Revision Date: 02/24/2023

TEST NAME	METHODOLOGY	LOINC CODE
NGS Solid Tumor	See Test Notes	n/a

SPECIMEN REQUIREMENTS				
Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment
Preferred	Block	Tissue	Formalin-fixed paraffin-embedded (FFPE)	Room Temperature

GENERAL INFORMATION	
Testing Schedule	Wednesdays, reports on Thursdays
Expected TAT	7-10 days
Notes	<p>Methodology: Nucleic acids are extracted then automated Next Generation Sequencing is used to perform genomic profiling of mutations, CNVs, and fusion variants.</p> <p>The full NGS report will be manually faxed to client.</p> <p>Pathology Reports: 8611000 Molecular Pathology Final Report 71652795 Addendum Report Molecular (If Applicable)</p>
CPT Code(s)	Billing via PLA: 81445, 88381, G0452-26
Lab Section	Molecular Diagnostic
