

Cepheid Flu A PCR

Order Name: **Cepheid Flu A PCR**

Test Number: 5197266

Revision Date: 06/08/2026

| TEST NAME         |  | METHODOLOGY                                     | LOINC CODE |
|-------------------|--|-------------------------------------------------|------------|
| Cepheid Flu A PCR |  | Allele-specific polymerase chain reaction (PCR) |            |

| SPECIMEN REQUIREMENTS |                                 |               |                             |                       |
|-----------------------|---------------------------------|---------------|-----------------------------|-----------------------|
| Specimen              | Specimen Volume (min)           | Specimen Type | Specimen Container          | Transport Environment |
| Preferred             | 1                               | Swab          | Viral Transport Media (VTM) | Room Temperature      |
| Instructions          | For Ascension Hospital Use Only |               |                             |                       |

| GENERAL INFORMATION |           |
|---------------------|-----------|
| Expected TAT        | 1 Day     |
| CPT Code(s)         | 87501     |
| Lab Section         | Chemistry |
